

# Putting Citizens At The Center With Innovative, Agile Apps

Shantanu Sharma, SAP Cloud Platform Global CoE  
September 06, 2019

# Modernizing Everyday Interaction & Improving Citizen Engagement

**Serves 380,000 citizens**

**Delivers 46 public services**

## **Challenges:**

- Significant **manual processes** built around an outdated service management system
- Citizens had **no visibility** of their interactions with the Council
- Council had **no single view** of customer information for request services

# Modernizing Everyday Interaction & Improving Citizen Engagement

## Solution:

- **Citizen Engagement Accelerator:** Citizen portal for quickly and easily interact via web or mobile apps when submitting service request or paying bills
- **Service Cloud:** Enables the Council to automate the processing of requests and giving it a centralized view of customer interactions regardless of channel
- **Geospatial Information System (GIS):** Allows tickets to be pinned to a specific location. Reduces the number of call backs by employees to confirm locations. Ensures tickets are routed through to the correct business unit first time

# Modernizing Everyday Interaction & Improving Citizen Engagement

“The digital interface we have for citizen interactions has enhanced engagement and improved service delivery. It has helped us simplify our internal processes, and enabled us to deliver better outcomes and experiences for our citizens.”

Dana Burnett, My Council  
Program Manager,  
Christchurch City Council

**Business insights increased** significantly overnight. The Council can now **visualize geographical trends**, allowing elected members to better understand constituents' needs.

Digitalization of processes now means **0% paper usage for field service officers**

A reduction in the request process times. **Ordering a rubbish bin previously took up to 4 weeks and can now be fulfilled in just days**

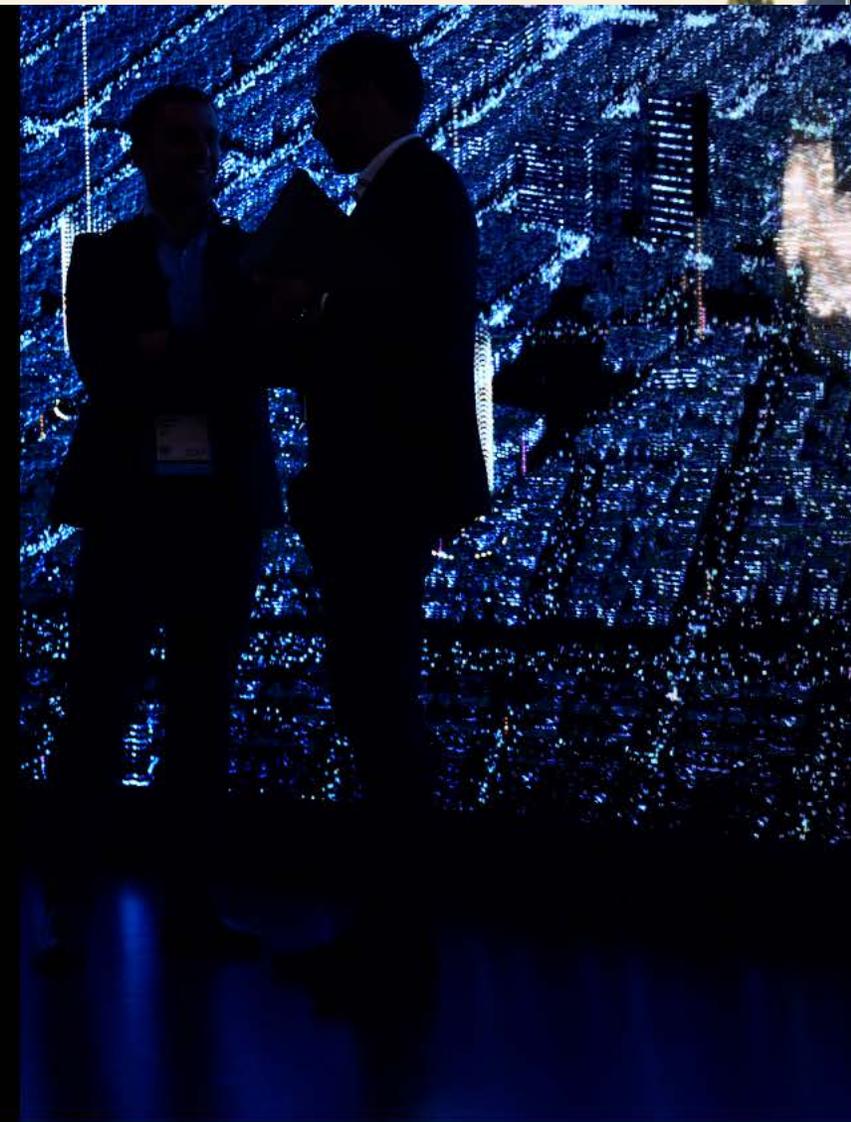

# The Queensland OSR **evaluated 187 million records** with machine learning to predict which taxpayers may become debtors.

## **SAP® Leonardo Machine Learning capabilities** helped the Queensland OSR:

- Make better decisions through data-driven insights
- Redefine business processes with taxpayers at the center
- Generate a 360-degree view of taxpayer needs and behaviors
- Predict taxpayers at risk of default with 71% accuracy
- Enable proactive, personalized payment plans and support for taxpayers to better meet their financial obligations
- Implement targeted campaigns to reduce levels of debt by at least 5%

“In the midst of a digital world, people want a human connection and services that are proactive and personalized. The true value of SAP Leonardo Machine Learning is the insights it provides to **enrich our taxpayers’ experiences**, create a client-centric environment, and realize better revenue outcomes for Queensland.”

Elizabeth Goli, Commissioner, Queensland Office of State Revenue

Queensland  
Government

**Office of State Revenue (OSR)**  
Queensland, Australia

**THE BEST RUN** 

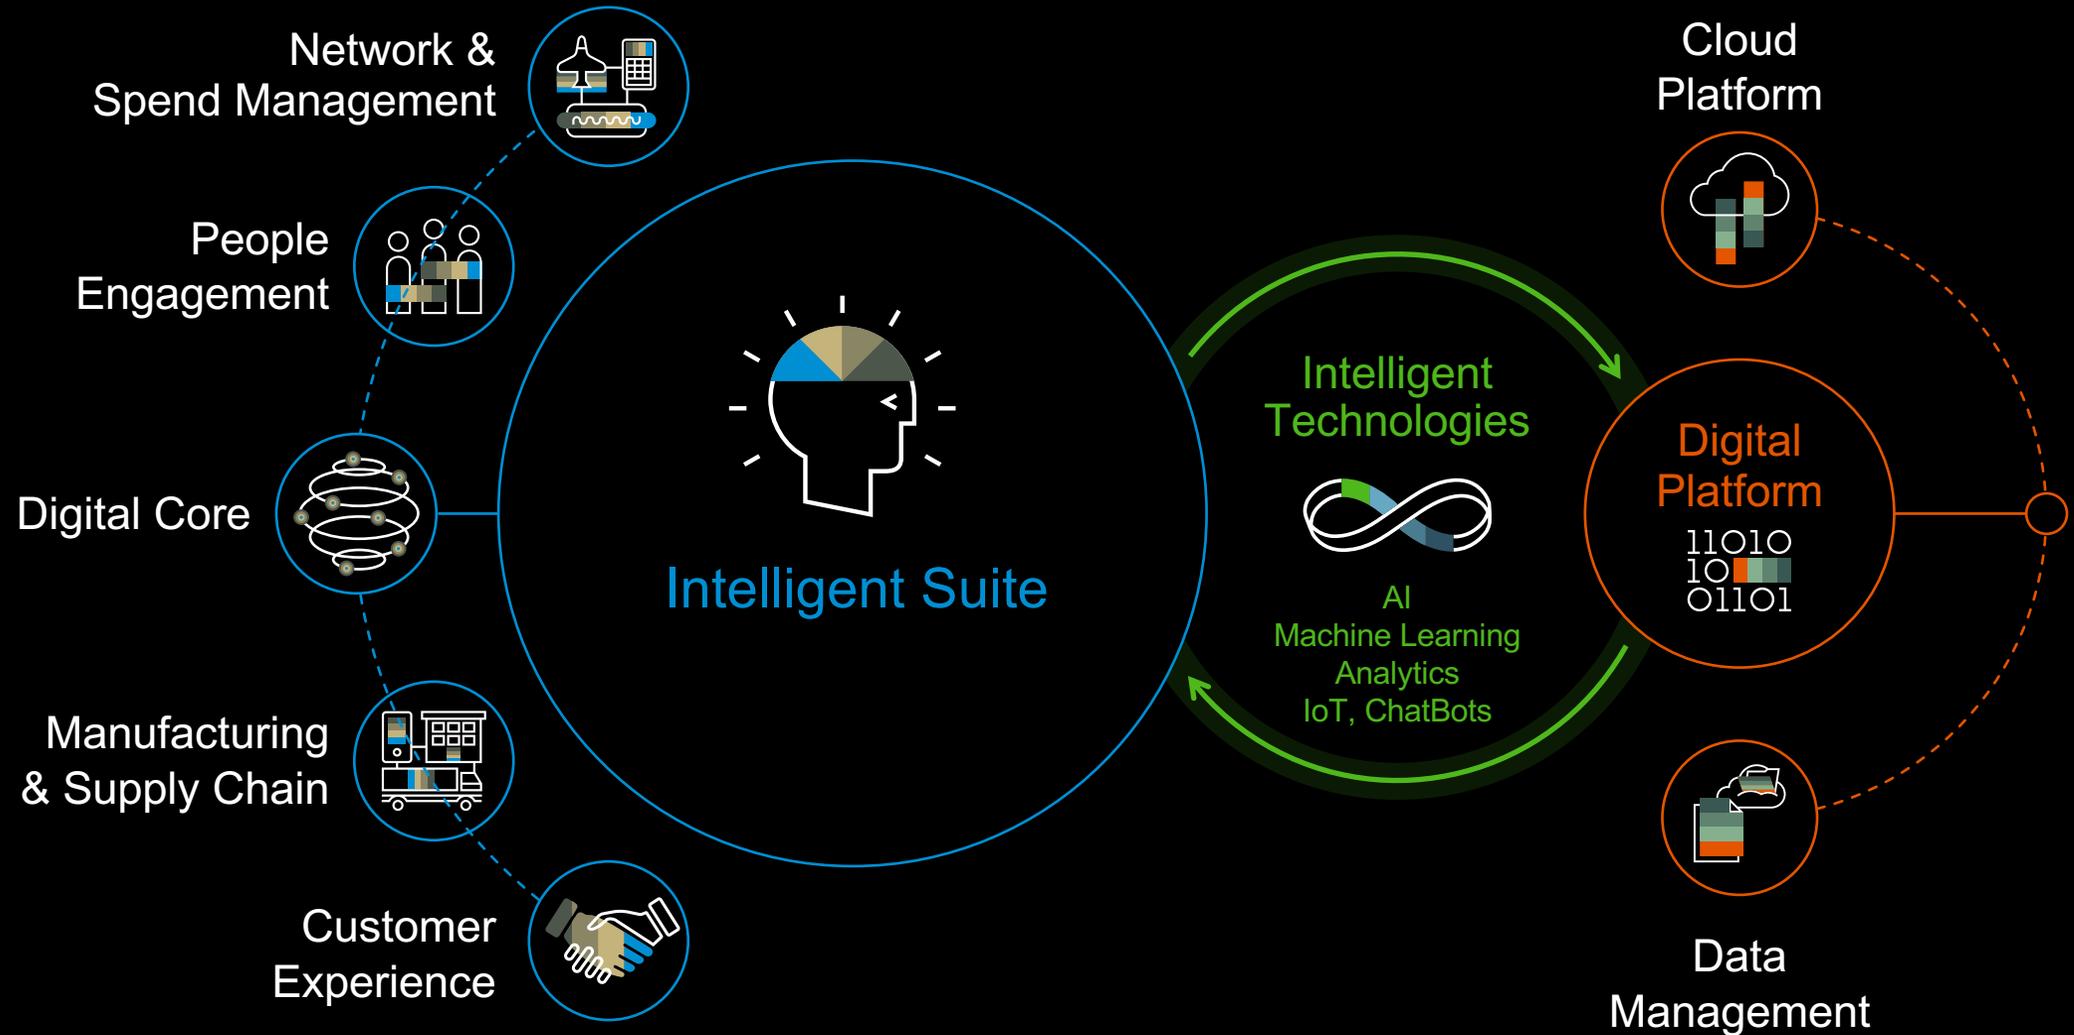

# SAP's Playbook For The Intelligent Enterprise

The "Why"  
The "How / What"

# SAP's Framework For **The Intelligent Enterprise**

# Why Most Orgs Have a Profound Challenge with Digital Transformation

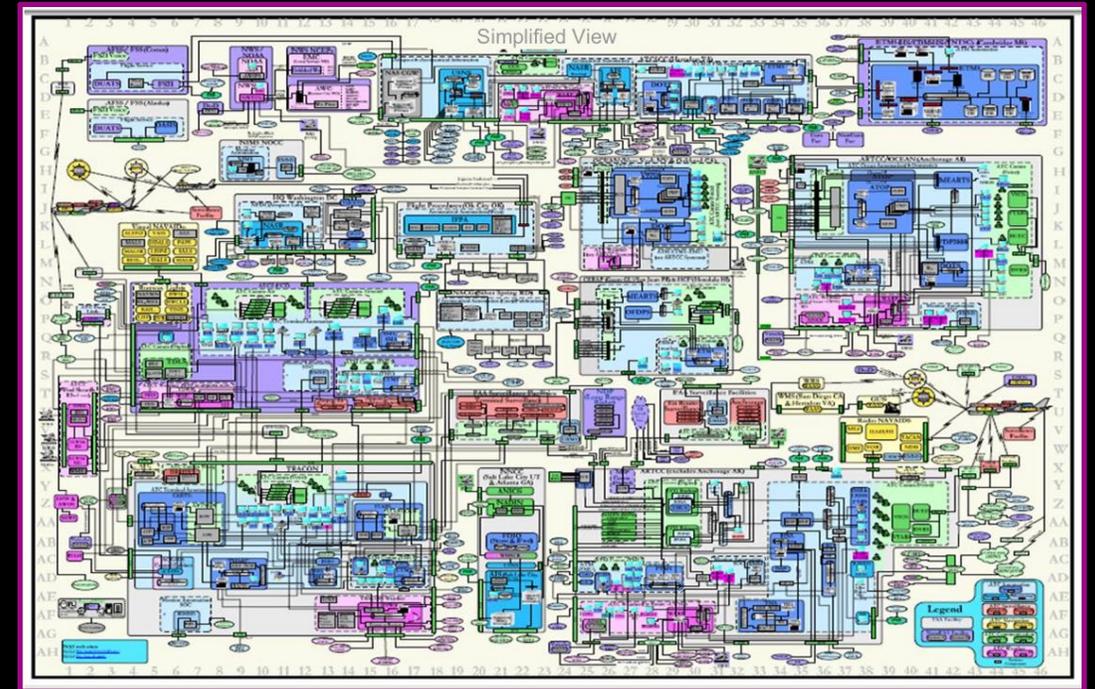

## The CIO's Legacy IT "Mountain"

- Aging legacy systems (ERP, etc.)
- Bureaucracy + overcentralization
- Years of underinvestment
- Traditional data center
- Technical debt
- Cost center focus
- Legacy skills
- Closed platforms/no APIs

With thanks to Maureen Blandford

v1.2

From <http://zdnet.com/blog/hinchcliffe> on by Dion Hinchcliffe

**Complexity** is IT's biggest challenge  
**Complexity** must be conquered in order to be nimble & efficient

# THE APP DELIVERY CHASM

While business demand continues to increase, IT output has not. And this gap between demand and delivery is only getting worse.

**71%** OF COMPANIES ARE BEHIND

## DEMAND IS GROWING

• 75% **Mobile**  
• 68% **Multi-Channel**

## IT IS LAGGING

**69%** Deliver IT Projects Too Late

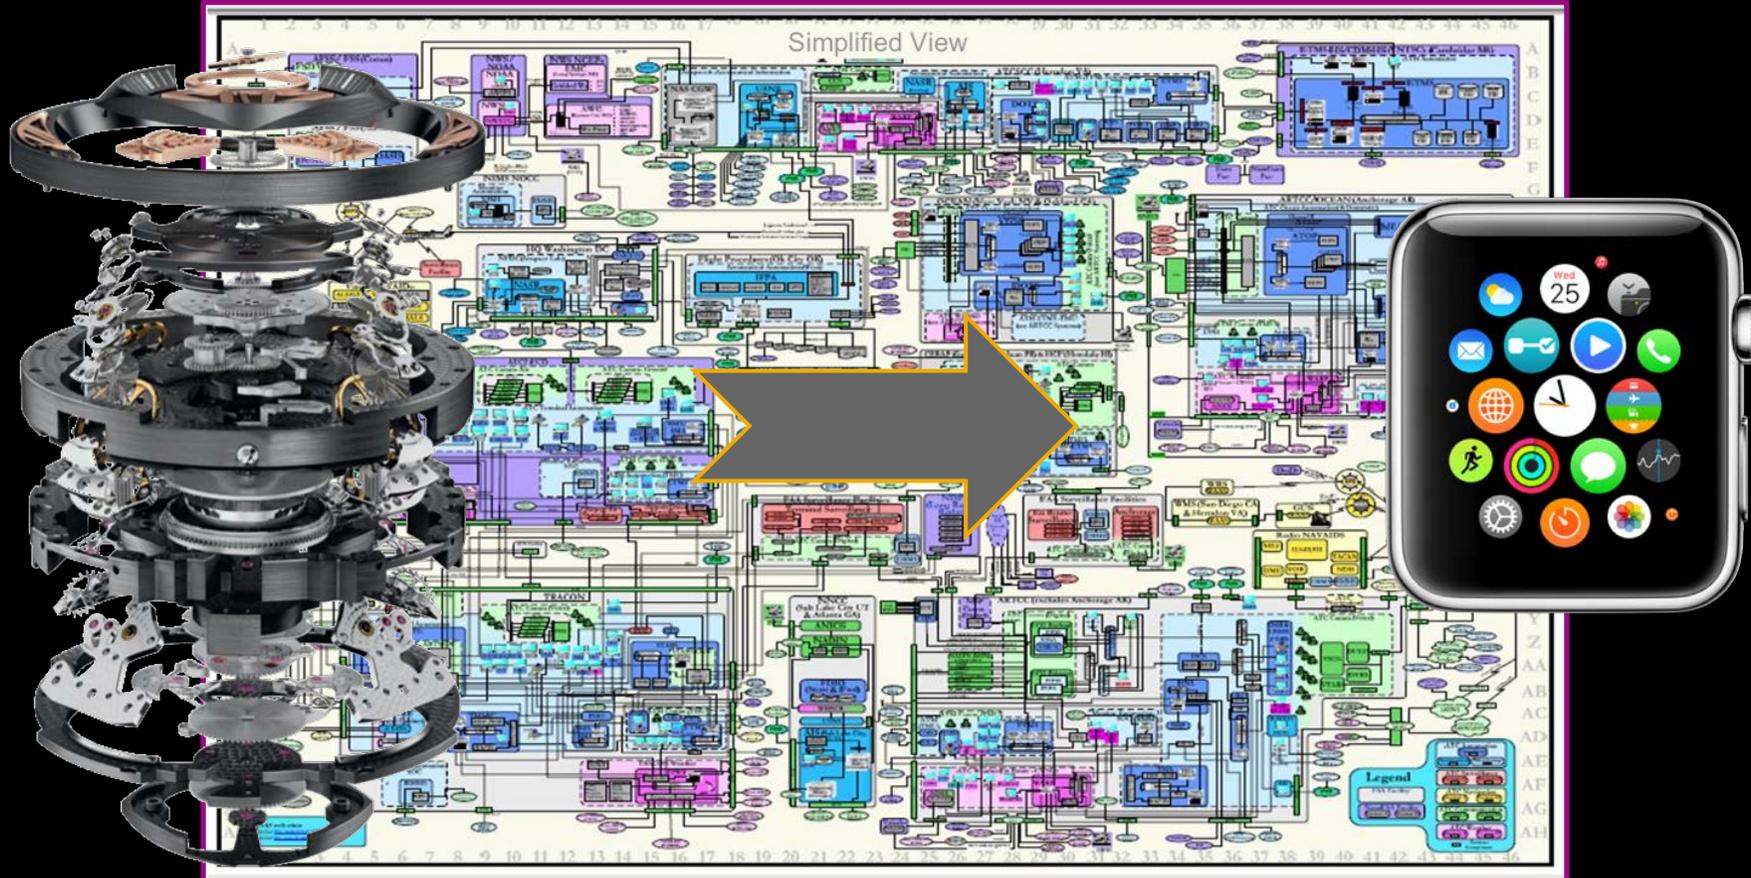

## BACKLOGS REMAIN

**89%** Unable to Reduce Backlog Year Over Year

Backlog is growing **faster** than I.T. can deliver **(today)**  
IT spends **80%** of its time keeping the lights on
