

## **Bryant Stevens**

USAF: 402 SMXG, Air Force Sustainment Command, Robins AFB

Bryant Stevens is the Lead Engineer for implementing Appian solutions at Robins Air Force Base. He is responsible for managing a team of organic Appian developers and designers to meet the needs of Robins AFB, WR ALC, and 402 SMXG. This team has developed and deployed over 20 applications. During Mr. Stevens's career in USAF, he has served as the Operations Officer for a production squadron, Flight Chief for various production workloads, and Project Manager and Test Engineer for multiple weapons systems. Prior to government service, Mr. Stevens worked in the telecommunications industry as a Project Manager and Outside Plant Engineer. He was responsible designing and managing installation of fiber optic networks and delivery of residential and commercial telecommunication services.
