

Ken Nesbit currently serves as Treasury Associate Chief Information Officer (ACIO) for Infrastructure Operations (IO). In this role, Ken is responsible for providing “effective, secure, and highly reliable computing services, for Treasury Departmental offices. He is also responsible for the policy, operations, and oversight of a wide range of telecommunications services for Treasury offices and Bureaus. This includes voice services, voice-conferencing, video-conferencing, and local and wide area network data services.

Ken held a number of Executive Level positions at the IRS prior to joining the Treasury CIO organization. He served as the Director, Requirements and Demand Management, where he was responsible for managing all of the IRS IT demand, providing business analysis requirements engineering support, assistive technology support, 508 compliance agency guidance, dissemination of employee directives and internal communications support. He also served as the Director, e-File Systems in the ACIO Applications Development, Submission Processing Domain. There, he was responsible for supporting electronic filing systems, including new development, operations and maintenance work for the Modernized e-File (MeF) system and operations and maintenance for legacy systems, electronic and management filing systems and the Filing Information Returns Electronically system.

Prior to joining the IRS, Ken served 20 years in the U.S. Air Force, working as an air traffic controller in complex radar and tower facilities and as a functional IT analyst on several major IT implementations. In 1987, he entered the program management field, where he managed large mainframe Unisys systems throughout the Air Force, and was the program manager for the consolidation of 214 major systems to five dedicated locations. After retirement, Ken worked with Management Consulting and Research for eight years as a cost analyst and as the Director over a number of offices conducting Program Management and Cost functions in the DoD. Ken also worked with Unisys Corporation for five years, specifically in 1997 as Director, Testing and Security, for the IRS Service Center Consolidation program. In 2000 he was the Program Manager for the Enterprise Business solutions, supporting business enterprises across the globe.

Ken is a certified project management professional and earned a bachelor’s degree with distinction in human resources from Faulkner University, Montgomery, Ala. He also holds a master’s degree in Human Resource Management from Troy State University.
