

Steve Roberts has been an active and productive member of the information technology and information security industry for more 25 years as an entrepreneur, corporate executive, manager, consultant, system architect, researcher, software engineer, and industry subject matter expert. Mr. Roberts offers a broad base of knowledge and experience in best practices related to information technology, corporate leadership, industry standards, budget and cost management, and contracts & acquisition management. He provides direct experience with implementation, management, and business use of Identity and Access Management (IAM), Public Key Infrastructure (PKI), smart card, network security, and cryptographic technologies as well as security policy and implementing secure electronic business solutions. Mr. Roberts is the Chief Operating Officer of LS3 Technologies; a business specialized in the disciplines of identity management, security management, and complex IT and business solutions. In his time at LS3, Mr. Roberts has been a Senior Program Manager, Technical Architect, Solution Designer, and Systems Developer integrating complex business and technical solutions (e.g., HSPD-12, IAM/FICAM, and enterprise PKI) for LS3's customers.
