

Jeff Simpson has over 25 years of software development and management experience across the government, commercial and academic research spaces. Specializing in distributed computing infrastructures, Mr. Simpson has operated as a thought-leader and in the field with the Military/Intelligence Community for the last 10 years.

Mr. Simpson is currently the Lead Architect for the Defense Intelligence Information Enterprise (DI2E) Framework PMO with special focus on the Service Discovery and Intermediation. Previously, Mr. Simpson was chief architect or a senior advisor on several major military and Intelligence Community SOA infrastructure programs including ER2, NECC and NCES SOA Foundation.

Mr. Simpson just recently returned from a yearlong deployment to Afghanistan, operating as a knowledge management consultant for Intelligence (J2) and Operations (J3) from HQ ISAF in Kabul to RC-South in Kandahar.

Previous positions include the Federal CTO Architecture team at IBM, and Chief Federal SOA Architect at BEA.
