Micheline Casey is the Chief Data Officer of the Board of Governors of the Federal Reserve System. She heads the Office of the Chief Data Officer (OCDO), an enterprise data management service organization, and leads the transformation of data management and information sharing across the Board. She is responsible for the development and implementation of the Board's data strategy, and oversees teams responsible for both strategic and operational data management functions. She also provides thought leadership to Board senior executive level division directors around data innovation, in alignment with mission critical functions and new business drivers.

Ms. Casey is a private and public senior executive with almost 20 years' experience helping organizations grow and achieve a strategic advantage through the use of data and information technology to support strategic objectives. She was the first state government Chief Data Officer in the country. Ms. Casey was responsible for developing and executing the State of Colorado's enterprise data strategy and data governance and data management frameworks across the State's Executive Branch agencies. Her private sector experience includes jobs at ChoicePoint Government Services (now LexisNexis Risk Solutions) and IBM Global Services.

Ms. Casey has won several honors, including DC's Top 50 Women in Technology and 2011 Top 25 Information Managers, and is an internationally recognized expert in the role of the Chief Data Officer and in creating new enterprise data capabilities.
