VERITAS™

Top Reasons to Choose a Multi-Vendor IT Analytics Solution

GAIN FLEXIBILITY, WITH END-TO-END VISIBILITY ACROSS MULTI-VENDOR ENVIRONMENTS.

Disparate environments impede the view across your multi-vendor IT infrastructure. Veritas APTARE IT Analytics™ changes these dynamics with a single pane of glass that provides visibility across your entire physical and virtual environments. Eliminate information silos across your infrastructure.

REDUCE THE COST AND COMPLEXITY OF MULTI-VENDOR ENVIRONMENTS.

IDC predicts there will be 175 ZB of data globally by 2025.[1] Hybrid environments drive up costs and complexity by forcing you to manage separate point tools from different vendors. With APTARE IT Analytics, you gain interoperability with all major storage, backup and cloud solutions from one unified platform. APTARE's technology consolidates and correlates all data, presents it through a single console and provides actionable insights to optimize resources and reduce operational costs.

LEVERAGE AN AUTOMATED SOLUTION COMBINING MACHINE-LED AND HUMAN-GOVERNED CAPABILITIES.

APTARE IT Analytics employs a simple, agentless collection process to gather information from 30,000 unique data points and then uses sophisticated algorithms to analyze and correlate that data in a single engine across all your backups, storage, hosts, hypervisors and storage networks. This automated process simplifies the customer experience with hundreds of out-of-the-box reports to measure KPIs, personalized dashboards and simple drag-and-drop dynamic report template designs at your fingertips. Easily customizable reports provide the precise information you need to make impactful business decisions.

OPTIMIZE DATA CENTER RESOURCES TO IMPROVE UTILIZATION AND PERFORMANCE.

Evolving businesses require an architecture that is flexible and efficient enough to grow with their needs. The APTARE IT Analytics platform has built-in multi-tenant capabilities designed from the ground up with a scalable architecture that allows chargeback or movement to ITaaS. With APTARE, you can streamline your chargeback reporting process across a hybrid IT data center, eliminate hours of manual research, reduce storage consumption and consolidate tools.

PREDICT FAILURES AND MITIGATE RISK TO SLAS.

Proactively predict failures and mitigate risk of missed service-level agreements (SLAs) through a common reporting platform. Feel confident that everything in your hybrid environment is protected with APTARE IT Analytics. Through predictive analysis, you'll receive a detailed report that informs you of an event before it occurs and identifies the root cause of an event. APTARE lets you optimize system and backup performance and align your SLAs with business goals.

GET ACTIONABLE INSIGHTS TO MEET AUDIT AND COMPLIANCE NEEDS.

Meeting backup compliance and corporate SLAs requires accurate and actionable insights to streamline the auditing process and ensure system recoverability. APTARE IT Analytics provides insights that reduce data protection complexity and mitigate policy conflicts and human error. APTARE automatically collects backup and data protection events, allowing access by internal and external auditors whenever it's required.
