BIO:

Steve Vetter serves as a Senior Global Strategist for Cisco and is a frequent speaker at numerous national conferences. He helps develop Cisco's approach to delivering new capabilities and solutions for governments to enhance their mission outcomes. He specializes in advanced AI/ML-enabled security, intent-based infrastructures and comprehensive zero trust solution architectures. He works extensively with government agency CXO's, NIST and numerous government/industry advisory organizations.

Vetter has more than 20 years of IT industry strategic leadership experience focused on enhancing Government Agency mission success with special emphasis on: enterprise IT; cybersecurity; holistic, end-to-end architectural solutions; innovative delivery models; and critical infrastructure protection. Vetter, a retired Naval Intelligence Commander, served in a variety of Pentagon leadership positions related to protecting critical infrastructure, evolving defensive information warfare strategies, and fusing dynamic threat intelligence.
