

Viral Chawda, Managing Director, Data and Analytics

Viral is a Managing Director in KPMG's Data & Analytics Center of Excellence, and the global Data & Analytics lead for Government & Infrastructure domain.

He is a recognized leader in the art & science of applying analytics to unlock the value hidden in client's data and make an impact on their mission. Over last 19 years he has helped large commercial and government organizations across end-to-end information management lifecycle, from Enterprise Data Strategy definition to execution of large BigData and advanced analytics embedded projects. He has helped clients with optimization and monetization of their data assets, and led world-class analytics based client delivery teams. He is recognized as an architect of the strategy for design and delivery of disruptive decision science solutions, across traditional business areas like - finance, risk, operations, supply chain, portfolio management and human services.

He is creative and structured problem-solver who understands how to leverage the ecosystem of alternative analytic methods and data sources as well as effectively drive Change throughout the organization to deliver value.

Prior to KPMG Viral successfully participated in leading and growing several analytics practices including PwC, Oracle, Cognos (IBM Company) & Financial Services Industry.
