Dr. Yahya Shaikh is Chief Data Officer at Greystone Health IT Solutions and serves as Senior Consultant to the Connect2Health[FCC] Task Force at the Federal Communications Commission. In this capacity, he advises the Task Force and agency leadership on the intersection of broadband, public and population health, and advanced technology. Dr. Shaikh previously directed the Johns Hopkins University Health Innovation Lab and currently serves as adjunct faculty in the Health Systems Program at the Johns Hopkins Bloomberg School of Public Health. Dr. Shaikh is a physician technologist and innovator, and an expert on connected health systems. His research and practice have focused on using connectivity and information technology to add real-time, analytic, and artificial intelligence capabilities to strengthen public health systems. Dr. Shaikh's research interests are related to meeting the chronic care needs of our nation and towards understanding how innovations in informatics and technology can improve the health of communities in the U.S. and abroad. In the past, he has worked in the international health and humanitarian response sectors, directed multi-sectoral disaster response teams, and provided consultation to the World Health Organization for equity in humanitarian response. He continues to research using data and emerging technologies to strengthen humanitarian responses. He has also advised a broad range of startups in the connected-health space related to analytics, artificial intelligence, IoT, nanotechnology, and genomics. Dr. Shaikh obtained his medical degree from the University of California, Los Angeles and completed residency training in Preventive Medicine at Johns Hopkins. Dr. Shaikh also has a Master of Public Health degree, with a double focus on Epidemiology and Biostatistics, and Humanitarian Assistance and Human Rights. In addition, Dr. Shaikh is currently an adjunct faculty member at the Keck School of Medicine, University of Southern California.
